KZR INiG System /11.1
Annex 11.2 – Risk assessment - Level B

System KZR INiG /11.2 Risk assessment – Level B	Cracow, May 2025	Directive 2018/2001 as amended by Directive 2023/2413
---	------------------	--

	Certification system of sustainable biofuels, biomass fuels and bioliquids production	Issue: 4 th
		Date: 05/05/2025
	<i>Annex 11.2 – Risk assessment – Level B</i>	Page 2 of 5

Table of contents

1. Authors' profile.....	3
2. Scope of the assessment and summary	3
3. Date of the risk assessment.....	3
4. Identification of the sourcing area	3
5. Forest characteristic in the sourcing area	3
6. Evaluation of the level of risk for each criterion	3
6.1. The legality of harvesting operations	3
6.2. Forest regeneration of harvested areas	3
6.3. Soil quality management and Biodiversity.....	3
6.4. Areas designated by international or national law for nature protection purposes	3
6.5. Maintenance of long-term production capacity of forests.....	4
6.6. Guarantee of carbon sequestration parity	4
6.7. 'No-go' areas	4
6.8. Summary.....	4
7. Results	4
8. Changes compared to the previous edition.....	5

	Certification system of sustainable biofuels, biomass fuels and bioliquids production	Issue: 4 th
		Date: 05/05/2025
	<i>Annex 11.2 – Risk assessment – Level B</i>	Page 3 of 5

1. Authors' profile

[Information about the authors and their roles in the risk assessment]

2. Scope of the assessment and summary

[This section contains essential information about the analysis]

3. Date of the risk assessment

[This section contains dates of issuing and validity of the assessment]

4. Identification of the sourcing area

[This section contains description of sourcing area i.e. geographical location, size, topography and other essential information]

5. Forest characteristic in the sourcing area

[This section should contain the description of the structure of forestry]

6. Evaluation of the level of risk for each criterion

6.1. The legality of harvesting operations

[The FGP needs to provide evidence that criteria are met according to the pathway defined on the Figure 3 of the document no 11]

6.2. Forest regeneration of harvested areas

[The FGP needs to provide evidence that criteria are met according to the pathway defined on the Figure 4 of the document no 11]

6.3. Soil quality management and Biodiversity

[The FGP needs to provide evidence that criteria are met according to the pathway defined on the Figure 6 of the document no 11.]

6.4. Areas designated by international or national law for nature protection purposes

[The FGP needs to provide evidence that criteria are met according to the pathway defined on the Figure 5 of the document no 11]

System KZR INiG /11.2 Risk assessment – Level B	Cracow, May 2025	Directive 2018/2001 as amended by Directive 2023/2413
---	------------------	---

	Certification system of sustainable biofuels, biomass fuels and bioliquids production	Issue: 4 th
		Date: 05/05/2025
	<i>Annex 11.2 – Risk assessment – Level B</i>	Page 4 of 5

6.5. Maintenance of long-term production capacity of forests

[The FGP needs to provide evidence that criteria are met according to the pathway defined on the Figure 7 of the document no 11]

6.6. Guarantee of carbon sequestration parity

[The FGP needs to provide evidence that criteria are met according to the pathway defined on the Figure 8 of the document no 11]

6.7. 'No-go' areas

[Rules for verifications are analogous as it is described for farmers in System KZR INiG/5 point 6.1, 6.2 and 6.4 respectively. Auditors verify compliance with this criterion during an audit, however FGP is obliged to provide all needed information. Results of this verification are included in the check list].

6.8. Summary

No	Criterion	Findings	Score [0/1]	Remarks
A	B	C	D	E
1.	The legality of harvesting operations			
2.	Forest regeneration of harvested areas			
3.	Biodiversity			
4.	Soil quality management			
5.	Areas designated by international or national law for nature protection purposes			
6.	Maintenance of long-term production capacity of forests			
7.	Guarantee of carbon sequestration parity			

7. Results

[Results shall explicitly indicate whether or not Level B is met]

System KZR INiG /11.2 Risk assessment – Level B	Cracow, May 2025	Directive 2018/2001 as amended by Directive 2023/2413
---	------------------	---

	Certification system of sustainable biofuels, biomass fuels and bioliquids production	Issue: 4 th
		Date: 05/05/2025
	<i>Annex 11.2 – Risk assessment – Level B</i>	Page 5 of 5

8. Changes compared to the previous edition

Date	Section	Previous requirement	Current requirement
05.05.2025	Whole document	RED II	RED III
05.05.2025	Whole document	Directive 2018/2001	Directive 2018/2001 as amended by Directive 2023/2413
05.05.2025	6.7.	-	Added: 6.7. 'No-go' areas [Rules for verifications are analogous as it is described for farmers in System KZR INiG/5 point 6.1, 6.2 and 6.4 respectively. Auditors verify compliance with this criterion during an audit, however FGP is obliged to provide all needed information. Results of this verification are included in the check list]
